EDUCATION

TON DUC THANG UNIVERSITY

Bachelor of Computer Science

GPA: 3.06/4.00 Classification: Good

Ho Chi Minh City, Vietnam

2022 – 2026

EXPERIENCE

TMA Solutions

AI Engineer Intern

Ho Chi Minh City, Vietnam

March 2026 – May 2026

- Researched and developed Sign Language Recognition solutions using deep learning models
- Collected and processed a custom sign language video dataset, including keypoint extraction and data augmentation
- Improved the data preprocessing pipeline to handle variable-length sequences and missing keypoints
- Optimized model performance through architecture tuning and hyperparameter adjustment

PROJECTS

Vietnamese Legal Chatbot

In Progress

- Architected an Agentic GraphRAG-based legal chatbot combining LLM reasoning, graph retrieval, and vector search to answer legal-domain questions
- Developed a backend retrieval system that processes legal documents, extracts legal entities and relationships, and indexes them for hybrid search
- Implemented agentic workflows for query decomposition, retrieval strategy selection, context ranking, answer synthesis, and citation verification
